* Minimum and maximum wall thicknesses above are for mild steel and chrome moly. Minimum wall thickness for aluminium is 3mm. **If you intend to bend 1.6mm wall stainless please contact us for advice on die selection.**

* C/L Radius is the radius measured at the CENTRE LINE of the material being bent.

* Prices subject to change.

* We make every effort to keep this list up to date, however stocks of the common items can change hourly. Very recent changes may not be reflected in this list, please confirm stocks by phone or email.

105 Dies below are being run out at special prices

We don't usually stock the sizes below and have very limited stocks.
This specials list changes regularly, please check back often.
